

Requirements for XpressView

Server Host:

- Windows Server 2003 Standard
- .Net Framework 2.0 and any possible updates to it.
- Windows Installer 3.1
- This machine should be on the same domain or workgroup as IPCC (or UCCX)
- No special hardware requirements (mid range server: Dual Core 2 GHz, 1 or 2 GB)
(will be following up with some hard numbers after we test internally)

Client Host(s):

- Any Windows OS that supports the .Net Framework 2.0
- Net Framework 2.0 and any possible updates to it.
- Windows Installer 3.1
- Video card that supports 32 bits color depth
- Visibility to the machine where XPV Server will be running on.
- No other special hardware requirements

XPV deployment:

- XPV Server Host has to belong to the same workgroup as UCCX (IPCC), typically 'VOICE'
- The password on the Administrator account on the XPV Server Host has to match that of UCCX(IPCC)
- Access to XPV Server Host: VPN and RDP (or VNC) and respective accounts. Windows account needs local admin privileges.
- Access to port 1433 (or whichever port SQL Server was setup to listen on) on XPV Server Host

Miscellaneous:

- VPN Access
- IPs, User Names and Passwords
